LICENCE DASHBOARD™ SMALL BUSINESS EDITION

In one integrated, affordable solution, designed specifically for smaller organisations, Licence Dashboard™ Small Business Edition delivers many of the features and benefits previously only available to large enterprises

With software taking up an ever increasing share of an organisation's IT budget, it has become even more important to manage, control and protect your software assets. Having a greater understanding of your licence position and being able to track what software has been deployed can definitely help you avoid unnecessary expenditure and risk.

"This unique product enables organisations to comprehensively manage an effective Software Asset Management programme. At Microsoft we look at ways in which we can help our customers achieve ongoing SAM processes and provide long term benefits from being compliant - Licence Dashboard enables you to achieve that"

Amanda Sleight
Head of Licensing, Microsoft UK

Microsoft

 **LICENCE DASHBOARD™**

WHAT'S INCLUDED?

Included within Licence Dashboard Small Business Edition is:

Licence Dashboard™

With Licence Dashboard, organisations can effectively and automatically control their software assets from purchase, to upgrade and beyond.

From a single view, an Administrator can report exactly what the organisation is allowed to install, determine how many licences have been allocated, verify how many licences are still available and be alerted to any maintenance renewals which are due.

This unique application enables organisations to manage day-to-day licensing chores without the user having to be a Licence Specialist. It also provides greater clarity – putting you in a better negotiating position and promoting more informed purchasing decisions.

Dashboard Discovery™

Dashboard Discovery provides a comprehensive software and hardware inventory for Microsoft Windows-based networks.

Total visibility of your software assets is a good starting point for any organisation trying to establish a long-term Software Asset Management programme. Dashboard Discovery tracks all IT assets deployed across your organisation.

Whether the aim is to take control of software licensing, drive down IT costs or ensure that projects are brought in on time and under budget, Dashboard Discovery provides a baseline of asset information across the entire network.

Best Practice Guide

To enable your organisation to implement and configure Licence Dashboard and Dashboard Discovery, the Small Business Edition incorporates a Best Practice Guide.

The Guide takes you through the implementation process step-by-step and assists you in aggregating your organisation's compliance position.

Support

In addition to the Best Practice Guide, your organisation will also receive direct telephone and email access to our highly experienced Licence Specialists. Plus, if that's not enough, you will also have access to a number of onsite visits.

QUALIFICATION

Licence Dashboard Small Business Edition is suitable for organisations that have less than 1,000 devices. Other versions are available for larger organisations and for those who have already implemented a discovery or IT Asset Management (ITAM) tool.

THE COST

Up to 500 seats	£5,000 (includes 1 onsite visit)
501-600 seats	£6,000 (includes 1 onsite visit)
601-700 seats	£7,000 (includes 2 onsite visits)
701-800 seats	£8,000 (includes 2 onsite visits)
801-900 seats	£9,000 (includes 3 onsite visits)
901-1,000 seats	£10,000 (includes 4 onsite visits)

Notes

Prices quoted above are exclusive of VAT and expenses, but do include first-year maintenance. Maintenance is charged at 15% of RRP and is optional in the second and subsequent years.

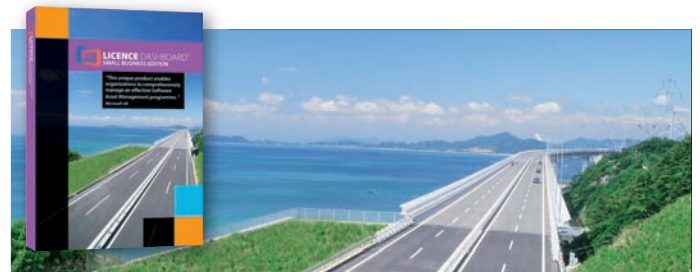

Onsite visits may be utilised to include one or more of the following:

- Implementation services
- Data cleansing services
- Licence reconciliation services
- Compliance rectification services
- Training
- Other related services by request

An onsite visit may, therefore, vary in duration dependent on the service(s) requested, but may be no longer than 7.5 hours. In addition, the onsite visit(s) must be used within one year of purchase.

If additional services are required beyond the permitted onsite visits included within the cost, then these can be requested and quoted for separately.

Licence Dashboard Small Business Edition grants the licensee permission to install, use and access one copy of the product and incorporates a single user licence and a single Business Unit at the site, in accordance with the terms and conditions of the licence agreement.

'Licence Management tools are potentially one of the most important tools in a SAM implementation.'
